

A nice round figure – the new 4ArXS HCD Ceramic from OSRAM!

For the first time, 4ArXS HCD® lamps combine two revolutionary innovations from OSRAM: the optimised spherical ceramic arc tube and eXtreme-Seal technology. The brilliant result is an extremely long lamp life of 8000 hours, excellent colour rendering at the red end of the spectrum, constant light and colour performance, more light and greater thermal load capacity. 4ArXS HCD® – for more innovative, creative and effective architectural and entertainment lighting go to: www.osram.com
